

UTTAR HARYANA BIJLI VITRAN NIGAM

Press Note

Rohtak, June 22 - Electricity consumers of over 120 villages of district Rohtak have experienced reliable and continuity of power supply after segregation of domestic and agricultural load of 27 feeders of 11 KV level. The Uttar Haryana Bijli Vitran Nigam (UHBVN) has already initiated the segregation of load on 5 more feeders and the work is targeted to be completed by the end of this month.

A spokesman said here today that there was a considerable reduction in tripping and breakdowns in the distribution system after segregation. The damage rate of distribution transformers has come down after the new arrangement of power supply. Consumers have also felt improvement in voltage and continuity of power supply in domestic as well as agricultural usage of electricity.

He said that the Nigam had energized 27 new feeders having exclusive agriculture load to supply uninterrupted power to tubewell consumers. It had reduced load on the feeders having mixed load of domestic and tubewell categories. The new feeders have been connected with 220 KV Sub Station Rohtak, 132 KV Sub Station Rohtak, 132 KV Sub Station Kheri Meham, 132 KV Sub Station Kalanaur, 33 KV Sub Stations at Hasangarh, Lakhan Majra, IDC Rohtak, Jassia, Bhalout, Kansala, Ritauli, Bhagwatipur, Jhajjar Road Rohtak, Baniyani etc.

The spokesman further stated that the Nigam has directed the field officers to ensure power supply to tubewell consumers strictly as per schedule. The tubewell consumers will get power for minimum six hours daily during June for their sowing requirements.
